EDUCATION

Manav Rachna International Institute of Research and Technology, Delhi NCR <i>Bachelor of Technology in Computer Science and Engineering; CGPA: 8.00/10.0</i>	2027
Narayana Junior College, Vijayawada <i>Board of Intermediate Education, Andhra Pradesh; Percentage: 88.00%</i>	2022
Narayana Olympiad School, Rajamahendravaram <i>Board of Secondary Education, Andhra Pradesh; Percentage: 99%</i>	2020

EXPERIENCE

Salesforce Developer Intern, Astrea IT Services , Noida <i>Remote</i>	June 2026 - July 2026	link
- Developed a Salesforce-based Film Production House Management System for managing productions, contributors, and organizations. - Built custom objects, Apex classes, SOQL queries, validation rules, and Record-Triggered Flows . - Designed Lightning Experience pages, reports, and dashboards to monitor contributor activity . - Tested, debugged, and refined Salesforce features following Salesforce development best practices.		

PROJECTS

AI-Powered Resume Screening and Ranking System <i>Systematic comparison of resumes against job descriptions</i>	April 2026
- Built an AI-Resume Screening & Candidate Ranking System, a Streamlit-based web application allowing recruiters and hiring managers to upload multiple resumes against a job description using NLP techniques - Combined TF-IDF and Sentence-BERT (via Hugging Face) for keyword and semantic similarity matching - Implemented resume text extraction, cleaning, scoring, and ranking with an interactive results dashboard Technologies Used: Python, Streamlit, NLP (TF-IDF + Sentence-BERT), Hugging Face, Scikit-learn, Pandas.	
IT Helpdesk & Ticketing System <i>Role-based issue tracking system with automated SLA monitoring</i>	July 2026
- Built a role-based IT helpdesk system in Streamlit for employees to raise tickets and admins to track and resolve them - Designed a relational database with linked Users and Tickets tables to store status, priority, and history - Added automated SLA tracking to flag overdue tickets based on priority, helping admins prioritize urgent issues - Built an analytics dashboard showing ticket volume, resolution time, and SLA compliance Technologies Used: Python, Streamlit, MySQL, Pandas, Matplotlib.	
Seat Belt Detection using Deep Learning <i>Research paper analysis and object detection with YOLOv11 deployed model</i>	June 2025
- Developed a real-time seat belt detection model using YOLOv11 and OpenCV for driver safety monitoring - Achieved strong performance with mAP of 94.6%, precision of 95.3%, and recall of 90.0% on custom/test dataset - Implemented preprocessing, inference pipeline, and visualization for accurate bounding box detection in varied driving conditions Tech Stack & Tools: Python, YOLOv11, OpenCV, PyTorch, Roboflow.	

TECHNICAL SKILLS

Languages: Python, C
Frameworks: PyTorch, TensorFlow
Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Tools: Git, GitHub, Google Colab, Jupyter
Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Natural Language Processing

EXTRACURRICULAR LEADERSHIP ACTIVITIES

Executive Member, OP Bhalla Foundation <i>Manav Rachna International Institute of Research and Technology</i>
Collaborated as a member/volunteer with Dr. O.P. Bhalla Foundation's multidisciplinary team to lead sustainable and geriatric care initiatives, including large-scale tree plantation drives, waste recycling programs, and support for old age homes through donations, health camps, volunteer visits, and elderly welfare activities

ACHIEVEMENTS AND CERTIFICATIONS

- Accenture iAspire Go for Gold Contest Certification – Accenture. - Python for Data Science and Machine Learning – Udemy. - Solver 150+ problems on leetcode and geeks for geeks. - Mastering Data Structures & Algorithms using Python.	link link
